

## **Corporate Office Centers Expands Operations in Atlanta Market**

### **Leading Business Center Operator Opens 3<sup>rd</sup> Location in Atlanta**

ATLANTA (October 2006) - Corporate Office Centers<sup>®</sup>, one of the nation's largest Office Business Center operators, recently opened its third Atlanta location, announced Corporate Office Centers' President, Thad Pittman. "The Atlanta area has proven to be a strong market for us, and we are excited to add this location to our Atlanta portfolio, in addition to our two other centers in Buckhead and Alpharetta," said Pittman. With this acquisition, Corporate Office Centers will have 24 business centers strategically located throughout the United States.

The One Glenlake Center in Atlanta is situated in the central perimeter of Atlanta, directly adjacent to GA 400 and I-285 in a Class A+ office building that is convenient to Fulton, Cobb and Forsyth counties. Close to Atlanta's most prestigious and affluent residential communities, this prime location is within an award-winning office project with beautifully landscaped grounds, including inviting patios with seating. Corporate Office Centers will occupy the seventh floor of the building, over 26,000 square feet. The newest Corporate Office Center will feature 65 upscale offices consisting of contemporary executive offices, team rooms and beautifully appointed meeting rooms.

Corporate Office Centers-One Glenlake will provide flexible terms and premium business services tailored to the requirements of business clients at a fraction of the cost of conventional alternatives. The complete office infrastructure is already in place, so there is no waiting for service, employees, furniture or equipment installations. Corporate Office Centers provides a "turnkey" solution to house one person or larger work groups, managing the office so the client can focus on their business.

Corporate Office Centers continues to afford one of the most cost-effective solutions for short- and long-term business requirements through its "total" office solution. The center presents a full spectrum of telecommunications services including personalized telephone answering, high-speed internet access, highly skilled administrative support and computer services, photocopying, facsimile transmission, and mailing services. "Our turnkey office solution eliminates many of the large capital investments that are ordinarily required to establish a new

office, and clients are charged reasonable rates only for the services they utilize,” says Pittman. This state-of-the-art approach can accommodate a wide range of professionals, from the Fortune 1000 corporate executive to the small business owner.

This business center also offers Virtual Office Programs. These convenient programs are designed for companies and home office professionals who wish to establish a presence, utilize a prestigious address, and employ the use of telecommunications, day office and meeting room capabilities on an as-needed basis. They are also used as a disaster backup resource and an approach to instantly expand a business presence in different markets. The Virtual Office programs provide a professional business environment without the expense of a full-time office.
