

## **Corporate Office Centers Adds Third Location to Denver Market**

June 1, 2007 - Corporate Office Centers®, one of the nation's largest executive suite business center operators, added its third center to the Denver office market in the heart of Inverness Business Park, complementing the two Denver area established centers located in the Denver Tech area and Broomfield. "Due to the growing demand for office solutions in this area, we are excited to add this center to our current Denver market portfolio as a cost-effective office solution to conventional office space alternatives," said Thad Pittman, President.

Located just off Interstate 25 at County Line Road across from the prestigious Inverness Golf Club, Corporate Office Centers - Inverness enjoys views of the front range of the Rocky Mountains. This building will provide office amenities just 20 minutes from Downtown Denver and 30 minutes from the Denver International Airport. Inverness Business Park is a world-class, high-amenity park, designed around an 18-hole championship golf course, the 130,000 square foot Colorado Athletic Club and the 300-room luxury Inverness Hotel and Conference Center.

Corporate Office Centers' Class A Inverness executive suite business center instantly provides flexible office terms and premium business services tailored to the requirements of clients at a fraction of the cost of conventional office space alternatives. The office infrastructure is already in place, so there is no waiting for service, employees, furniture, or equipment installations. The executive suite business center will provide a "turn-key" solution to house one person or larger work groups instantly, managing the office so clients can focus on their business.

Executive suite business centers continue to be one of the most cost effective solutions for short and long term business requirements as Corporate Office Centers offers the "total" office solution. The executive suite business centers are furnished complete with meeting facilities and a full spectrum of telecommunications services that include personalized telephone answering, high-speed internet access, highly skilled administrative support and computer services, photocopying, facsimile transmission, and mailing services. This turn-key office solution eliminates many of the large capital investments that are ordinarily required to establish a new office; clients are charged reasonable rates only for services utilized. This state-of-the-art approach can accommodate a wide range of professionals, from the Fortune 1000 corporate executive to the small business owner.

Corporate Office Centers also offers Business Identity Programs or "virtual offices." These convenient programs are designed for companies and home office professionals who wish to establish a presence, utilize a prestigious address, and employ the use of telecommunications, day office and meeting room capabilities on an as-needed basis. They are also used as a disaster

backup resource and an approach to instantly expand a business presence in different markets. These programs provide a professional business environment without the expense of a full-time office.
